Vogel Ceilings In Ireland – Case Study The Audi Centre Dublin

Client: Audi Ireland
Architect: EMD Architects
Main Contractor: Aidan Elliott Construction Ltd
Ceiling Contractor: Reilly Ceiling & Drywall Ltd

Situated in the heart of South Dublin, the innovative Audi Centre concept represents all facets of the Audi brand in a multimedia lifestyle and high end retail environment, this flagship dealership and showroom offers a comfortable and modern environment in which to showcase the latest Audi models. Fitting well with this design and performance criteria, Vogel ceilings were chosen to compliment Audi's "Vorsprung durch Technik" (Progress through technology) ideals. Vogel perforated ceilings throughout the Audi Centre Dublin offer a visual backdrop as well as functioning as a high performance acoustic absorbing platform. Vogel's unique seamless joint system allows for a fast and economic alternative to traditional joint filler methods. Additionally the Vogel Frieze tape system was used with great effect to compliment the design of the ceilings.

Vogel offer a range of design high performance acoustic ceilings that are functional, visual and economic.
