

# VogLightInside

## The ideal combination *of shape & light*

Create atmosphere using **VogLightInside**

## WHEN SEPARATING CEILING AND LIGHT

Typical planning processes often consider the construction of the ceiling separately from the step of lighting design. In this case, you need to create complex needs analyses for several trades and often moderate interface problems and conflicts of interests. You experience competence gaps in the co-operation of project participants and invest time and money in costly changes and agreements. This is frequently followed by unexpected problems in the construction and installation process, which you then have to react to spontaneously.

### Possible problems in everyday life

- Qualitative compromises in the final result
- Increased effort for coordination
- Stress and conflicts
- Delays in construction
- High subsequent claims

## THE OPPORTUNITY TO CONNECT BOTH

## OUR APPROACH

### YOUR ADDED VALUE

**VogLightinside** is your complete package of lighting and ceiling system in one go. Our qualified team is your competent partner throughout all project phases.

Thanks to the cooperation with our system partner Stageled, you can benefit from the expertise of interdisciplinary expert teams of architects, light planners and experts in electrical engineering and media technology, as well as designers, interior designers and Vogl Deckensysteme experts in holistic ceiling design.

#### You benefit from:

- An ensemble of shape and light coordinated in detail
- Interface optimisation thanks to short distances
- Satisfaction and a quiet working atmosphere through competence
- Financial transparency
- Execution within the schedule

## FROM STANDARD ELEMENT TO ANY SHAPE

**VogLightInside** offers you ready components and tailored solutions for your vision and your design.

Your freedom of design is almost unlimited. Simple geometric or complex three-dimensional shapes – **VogLightInside** provides custom-fit individual modules for the integration into your ceiling system. The high degree of prefabrication allows for faster installations.

You will additionally receive the lighting specified by you – from simple white light to complex dynamic systems.

### Precision in prefabrication and planning:

- Holistic assistance provided by one contact person
- Tailored solutions for ceiling and light
- Advice and support in all project phases
- Optimal lighting effect and flexible design
- Time efficiency in assembly and installation

## SHAPE AND LIGHT IN PERFECT HARMONY

## DESIGN PLANNING

### PROFESSIONAL ADVICE

We will be happy to provide advice during ideation, make design proposals and, if required, create holistic design concepts.

## APPROVAL PLANNING

### CREATION

We create technical documents for ceiling elements and lights. We account for material properties and provide light calculations, if required. We determine the budget and prepare economic considerations.

## IMPLEMENTATION PLANNING

### EXPERTISE

We are experts in developing detailed special parts and special lights and, upon consultation, hand over CAD drawings and 3D visualizations.

## TENDER

### DEVISING

We devise tender texts, examine and assess technical alternatives.

## IMPLEMENTATION

### INTEGRATION

We integrate ceilings and light elements in the room. We hand over installation details, installation plans and as-built documents. On request, we develop cable plans and light control concepts in all common protocols.

## INTERFACE

### DEFINITION

We define the mechanical and electrical integration and place special emphasis on the adjacent subsections and components.

## DELIVERY AND INSTALLATION

### ENABLING

We enable punctual and site-specific delivery. We assist you in your search for qualified companies and support the executing trades by phone or on site.

## COMPLETION

### ASSISTANCE

We assist you throughout all phases of your project right through to handover to the client.
