

Vogl Stretch Ceilings

Impressive play between form, colour and light

The spectrum of design possibilities has been significantly expanded with acoustic design ceilings. Using colour, light and degrees of gloss, the elegant integration of stretch ceiling surfaces in acoustic design ceilings makes for a striking aesthetic appearance and, in its function as an illuminated ceiling, provides a gentle surface lighting with variable colour mix. The superb diversity of both colours and shapes is imposing!

Clear geometric surfaces or freely defined shapes, combining various perforation patterns of the acoustic design panels, result in ceiling areas which are rich in contrast and can be level or stepped for 3D accentuation. In addition, Vogl's renowned economical, quick and reliable processing provides confidence in the final product.

Vogl Stretch Ceilings offer almost unlimited freedom of design with:

- exciting surfaces and three-dimensional shapes
- contrasts between colours and degrees of gloss
- accentuated interaction of light and illumination
- more corporate design by using printed foils
- ideal combination possibilities with Vogl acoustic design ceilings in form, colour and performance

Great when renovating:

- Minimal production and business down times
- No generation of dust and moisture
- Buildings generally remain operable
- No removal and disposal of existing ceilings
- No expensive new installations

Great in wet environments:

- Suitable for spa areas through foil colours or colour-controlled illuminated ceilings
- Completely moisture-resistant foils and profiles
- Splash protection for ceiling installations such as light and sound systems
- Reduction in the reverb time
