

Focused on colour to the very core

Vogl Colour Panels allow you to add colourful accents precisely and easily.

Colours influence our perception of rooms and our sense of wellbeing, while texture creates charismatic surfaces. Colour can be used in interior design to significantly improve the living and comfort factor.

In Vogl Colour Panels, the inner surfaces of the perforation are included in the factory colour treatment. This ensures high-quality and homogeneous colouration.

Putting colour into the picture

The unique prefabrication offers decisive advantages:

- Even colouration of the inner surfaces of the perforation
- Available in many shades of colour
- No time-consuming reworking after painting

Vogl Colour Panel offers the possibility of factory-applied or on-site colouring with colour combinations for finishing coat, inner perforation and fleece colour.

The finishing coat is always applied by the painter on-site.

Benefits of the Vogl Colour Panel:

- Perfectly sealed surfaces and properly coloured inner perforation surfaces
- Enormous time saving due to elimination of several work steps
- Satisfies highest aesthetic demands
